Mohit Chaudhari

Java Backend Developer

PROFESSIONAL SUMMARY

Dynamic Java Backend Developer with expertise in Java, Spring, Hibernate, and RDBMS. Collaborative problem solver with superb communication skills. Seeks to contribute to Java development projects and leverage emerging technologies.

PROJECTS

1. RentNRide | 🌐 | 🚗

Java | MySQL | Hibernate | Console-based interface

- Implemented a console-based interface for administrators and customers.
- Created Administrators functionality for adding new cars, updating availability, and viewing the cars list.
- Enabled Customers to search, view and make car reservations.
- A solo project, executed in 5 days.

2. Freecraft | 🌐 | 🚗

HTML | CSS | JavaScript | Local Storage | Mock API | JSON Server

- Implemented User and Admin authentication, sorting and filtering, and a payment page with multiple options.
- Developed features such as adding products to the cart and wishlist.
- Contributed to designing and developing a captivating landing page, managed git-related workflows and populated realistic mock API.
- A collaborative project involving 5 members, completed within a 5-day timeframe.
